

KAVEESHA MISHEN

Undergraduate Cybersecurity Student | Ethical Hacking Enthusiast | CTF Player
kaveeshamishen2002@gmail.com | +94 771646487 | Malabe, Sri Lanka
[LinkedIn](#) | [GitHub](#) | [Medium](#)

PROFESSIONAL SUMMARY

Undergraduate Cybersecurity student at SLIIT with hands-on experience building browser-based security tools, participating in CTF competitions, and developing practical applications focused on cryptography and web security. Experienced with JavaScript, Linux, Burp Suite, Wireshark, Web Crypto API, and Git/GitHub. Passionate about cybersecurity research, ethical hacking, and secure software development. Seeking internship opportunities to apply technical skills while contributing to real-world security initiatives.

EDUCATION

BSc (Hons) in Information and Communication Technology (Cybersecurity)

Sri Lanka Institute of Information Technology (SLIIT), Malabe | Oct 2023 -Nov 2027 (Expected)

TECHNICAL SKILLS

- **Operating Systems:** Kali Linux, Ubuntu, Windows
- **Networking:** TCP/IP, Network Protocols, Firewalls, Traffic Analysis
- **Security Tools:** Nmap, Burp Suite, Wireshark, Metasploit Framework
- **Development:** HTML5, CSS3, JavaScript (ES6), Web Crypto API, CryptoJS, Git, GitHub
- **Areas of Knowledge:** Cryptographic Hashing, Password Security, Web Exploitation, JWT Analysis, Vulnerability Assessment, CTF Competitions

PROJECTS

HashForge -Web-Based Cryptographic Hashing Tool

Completed

Technologies: HTML, CSS, JavaScript, Web Crypto API, CryptoJS | [GitHub](#)

- Developed a web application supporting MD5, SHA-1, SHA-256, and SHA-512 hashing and verification.
- Implemented hash classification, verification workflows, and copy-to-clipboard functionality.
- Designed a cyber-themed user interface focused on usability and accessibility.

Cyber Password Auditor -Password Strength Analyzer

Completed

Technologies: HTML, CSS, JavaScript | [GitHub](#)

- Developed a password analysis tool that evaluates password strength and identifies common security weaknesses.
- Implemented a security score calculator, interactive strength meter, and actionable security recommendations.
- Enhanced usability through keyboard shortcuts and real-time feedback.

BlackBox -Browser-Based Cybersecurity & CTF Toolkit

Active Development (v0.3.0)

Technologies: HTML5, CSS3, JavaScript (ES6), Web Crypto API, Git & GitHub

- Designed and developed a fully client-side cybersecurity toolkit targeting CTF competitors and security enthusiasts.
- Implemented multiple cryptography and web security utilities including hash generation, hash cracking, JWT analysis, parsers, and payload libraries.
- Built a scalable modular architecture to support future expansion into Forensics, OSINT, Reverse Engineering, and Binary Exploitation.

CERTIFICATIONS

- Foundations of Cybersecurity - Google (May 2026)
- Cybersecurity Fundamentals - IBM (May 2026)
- Introduction to Cybersecurity - Cisco (May 2026)
- Fortinet Certified Fundamentals Cybersecurity - Fortinet (May 2026, Expires May 2028)
- Getting Started in Cybersecurity 3.0 - Fortinet (May 2026)
- Introduction to the Threat Landscape 3.0 - Fortinet (May 2026)

CTF & PRACTICAL CYBERSECURITY

TryHackMe Profile: tryhackme.com/p/kaveeshamishen2002

- Actively participate in hands-on cybersecurity labs and Capture The Flag (CTF) challenges.
- Focus areas include web exploitation, penetration testing, enumeration, and network security.
- Continuously develop practical offensive and defensive security skills through guided learning paths and labs.

LANGUAGES

- English -Professional Working Proficiency
- Sinhala -Native Proficiency
